

Get Set Learn STEM Hackathon 2026

Welcome!

The Get Set Learn STEM Hackathon is an innovation event for students from Grades 1–12. STEM stands for Science, Technology, Engineering, and Mathematics. STEM learning helps students become problem solvers, innovators, creators, and future leaders. During this two-day hackathon (21–22), students will work in teams to identify real-world problems, generate ideas, build prototypes, and present solutions.

Get Set Learn aims to encourage curiosity, creativity, collaboration, communication, and critical thinking. Students will participate in age-appropriate challenges and learn how technology can be used to improve lives, communities, and the environment.

What is STEM?

STEM is an educational approach that combines Science, Technology, Engineering, and Mathematics into hands-on learning experiences.

Science: Understanding the natural world through observation and experimentation.

Technology: Using tools, computers, and digital solutions.

Engineering: Designing and building solutions to problems.

Mathematics: Using numbers, logic, and patterns to make decisions.

Benefits of STEM include improved problem-solving skills, teamwork, creativity, innovation, and preparation for future careers. Students are encouraged to ask questions, experiment, test ideas, and learn from failures.

Hackathon Objectives and Event Format

Objectives

- Encourage innovation and creativity.
- Promote teamwork and leadership.
- Develop presentation and communication skills.
- Apply STEM concepts to real-world challenges.
- Inspire lifelong learning and curiosity.

Event Schedule

Day 1 (21): Team registration, challenge announcement, ideation, mentoring, and prototype development.

Day 2 (22): Final prototype completion, presentation preparation, judging, awards, and closing ceremony.

Teams should focus on creating practical, ethical, and impactful solutions.

Rules and Participation Guidelines

Eligibility

Students from Grades 1–12 may participate.

Team Size

Minimum 1 and maximum 4 students per team.

General Rules

- Respect fellow participants, mentors, and judges.
- Projects must be original and created during the event.
- Teams may use open-source resources with proper acknowledgment.
- Plagiarism is not permitted.
- Unsafe, harmful, or inappropriate content is prohibited.
- Decisions of judges are final.
- Participants must follow venue and safety guidelines.

Any violation may result in disqualification.

Judging Criteria, Awards, and FAQs

Judging Criteria

Innovation (25%)

Problem Solving (25%)

Technical Implementation (20%)

Presentation & Communication (15%)

Impact & Feasibility (15%)

Awards

- Best Innovation Award
- Best Social Impact Award
- Best Beginner Team Award
- Outstanding Presentation Award

Frequently Asked Questions

Q: Do I need coding experience? A: No.

Q: Can I participate alone? A: Yes, team size can be 1–4.

Q: Can I build a model instead of software? A: Yes.

Q: What should I bring? A: Notebook, device (if required), and enthusiasm to learn.

We look forward to seeing your ideas shape the future through STEM!
